Compact Data Logger T / RH / Dew Point Monitoring

C Member of GHM GROUP

HD208 series

○ KEEP TRACK OF YOUR MEASUREMENTS

Monitor & record of temperature & humidity all along the process

WIDE RANGE OF MODELS FOR ANY APPLICATION

1 or 2 channel
Only temperature or combined with RH
Internal or external sensors

○ LOGGING FUNCTION EXTREMELY VERSATILE

Manual, automatic or delayed start and stop of the logging

MEASURED DATA DIRECTLY AVAILABLE

PDF report with charts and CSV file automatically generated

O FACTORY CALIBRATED AND READY TO USE

Pre-calibrated sensors No further calibration required

The ultimate easy to use logger series for a wide range of applications!

The **HD208** is a easy to use logger series for a wide range of applications: perfectly fit for any local measurement where it is important to record and to keep the data. Used in a diversity of segment in the industry: transport, food (HACCP), pharmaceutical warehousing, storage rooms.

Small, compact design: internal sensors for temperature or humidity and temperature combined. One or two external sensor types.

Additional the loggers can provide Dew Point calculation and even MKT (Mean Kinetic Temperature) specifically for food related applications. Free downloadable software for configuration and even real time monitoring and storage of measurement data in a local MySQL database. But reports can also be generated directly as PDF without further need of local software.

For FDA related measurements we provide the option to add software in accordance with 21CFR part 11 recommendations.

Main Applications

Production facilities
Storage rooms
Food process
Cooling chains

Technical Specification

RELATIVE HUMIDITY

Sensor	Capacitive
Measuring range	0100%RH
Resolution	0.1%RH
Accuracy	± 1.5%RH (0…85%RH) / ± 2.5%RH (85…100%RH) @ T=15…35 °C ± (2 + 1.5% measure)% @ T=remaining range
Sensor operating temperature	-40+80 °C
Response time	T_{90} < 20 s (air speed 2 m/s, without filter)
Temperature drift	±2% over the whole operating temperature range
Stability	1% / year

TEMPERATURE

Sensor	NTC10kΩ @ 25 °C
Measuring range	-40+105 °C*
Resolution	0.1 ℃
Accuracy	\pm 0.3 °C in the range 0+70 °C \pm 0.4 °C outside
Long-term stability	0.1 °C∕year

^{*} In the case of internal sensor or external fixed probe, the measuring range is limited by the maximum operating temperature of the instrument.

Dimensions

External probes with cable

TP35N1... Temperature probe with NTC10K Ω sensor.

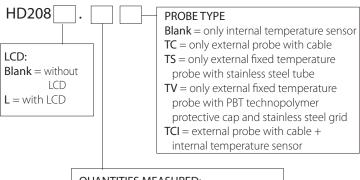

HP3517... Temperature and relative humidity combined probe.

GENERAL SPECIFICATIONS

Logging interval 1, 2, 5, 10, 15, 30 s / 1, 2, 5, 10, 15, 30, 60 min According to the model: Temperature - Mean Kinetic Temperature (MKT) - Relative Humidity - Dew Point - Battery Voltage. Flash memory with circular management or stop logging when full. Two alarm thresholds (configurable) for each measured quantity 3.6 V not rechargeable lithium-thionyl chloride internal battery (Li-SOCI2), size AA, 2-pole Molex 5264 connector. Battery life 2 years typical, with logging interval 30 s PC connection Operating conditions Material ABS (with added UV filters) Protection Degree IP 64 Weight 150 g approx. Wall mount		
Storable quantities Mean Kinetic Temperature (MKT) - Relative Humidity - Dew Point - Battery Voltage. Memory Flash memory with circular management or stop logging when full. QUANTITIES MEASURED:

N = temperature

1N = temperature and relative humidity

Accessories

HP3517... Temperature and relative humidity combined probe.

M12 4-pole connector. PBT technopolymer body. Available stem lenghts: 135 mm or 335 mm. Available

cable leghts: 2, 5 or 10 m.

TP35N1.xx/C Temperature probe with NTC10KΩ sensor. AISI 316

stainless steel tube. 4-pole M12 connector. Cable

length 3, 5 or 10 m.

HD35AP-CFR21 Advaced software option for FDA 21 CFR part 11

recommendations

CP23 USB connection cable

HD208.13 Aluminium flange for fixing the instrument to the wall.
