

HD2305.0

HD2305.0 PORTABLE pH METER

The **HD2305.0** is a portable instrument with a large LCD display. It measures the pH and the redox potential (ORP) in mV. It measures the temperature by using Pt100 or Pt1000 immersion, penetration, contact or air probes. The electrode calibration can be carried out on one, two or three points at 4.01pH, 6.86pH and 9.18pH. The temperature probes are equipped with the automatic recognition SICRAM module which contains the factory calibration data stored inside.

The *Max*, *Min* and *Avg* function calculate the maximum, minimum or average values. Other functions include: the relative measurement REL, the Auto-HOLD function, and the automatic turning off that can also be excluded.

The instruments have IP67 protection degree.
